Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 5, 10, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Sidikman et al (US Patent No. 7,110,981).

As per claims 5, 10, 12 and 13, Sidikman et al disclose a computerized system, program and automated method for controlling trading volume in a data processing system for stock trading. See the abstract. Sidikman et al teach receiving a trade order of exchange trading hours from a non-institutional user indicating a number of shares to be traded in real-time;

Determining a limit for a number of shares to be traded; and

Rejecting the trade order based on whether the number of shares to be traded is equal to or greater than the determined limit and accepting the trade order if the amount of shares is less than the determined limit and receiving the trade order from a non-institutional user via a broker-dealer.

Applicant is directed to column 16, lines 31-66.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sidikman et al (US Patent No. 7,110,981) in view of Lancaster (WO 97/30407).

As per claims 1-4, 6-9 and 11, these claims contain limitations found in claim 5 and these claims are rejected under a similar rationale. Claims 1, 6, 9 and 11 recite a feature of receiving “a trade order outside of exchange trading hours” which is not explicitly stated in Sidikman et al. As per this limitation, Lancaster teaches a trading system which allows “the opportunity to trade 24 hours a day, to potential investors from every office and home in the world”. See the abstract of Lancaster. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the feature of receiving a trade order outside of exchange trading hours as taught by Lancaster into Sidikman et al in order to allow 24 hours a day trading by a potential investor with the motivation of increasing trading transactions within the combined system.
